Capturing Video Snapshot Scenes and Photos from a Movie You can capture video snapshot scenes or photos from a previously recorded scene. When the source scene is itself a video snapshot scene, you may not be able to capture a video snapshot scene depending on the length of the source scene and the length currently selected for video snapshot scenes. The camcorder will play back the scene selected and continue until the end of the last scene in the index screen. Select the desired music track. Adjust the background music balance. Play back the original sound no background music. Delete the music track selected. Listen to the music track selected. Touch again m to stop the playback. 3 Adjust the mix balance between the original sound and the background. Make sure to follow applicable laws when using music files. The large thumbnail will show the first frame of the scene. Below it, the timeline ruler shows frames taken from the scene at fixed intervals. 3 Touch the desired frame in the timeline ruler to start playing back the scene from that point. By doing so, you leave only memorable moments to keep for posterity. For details, refer to the Software Guide PDF file of PIXELAs software. Copying Scenes from the Index Screen Operating modes Open the desired

index screen in the builtin memory 50, 93, 94.

For AVCHD movies, the date will appear in the control button. To select individual photos 1 Touch the individual photos you want to copy. This is convenient, for example, when you want to upload the MP4 movies to the Web. The movie you want to convert must be in the builtin memory. After conversion, the resulting MP4 movie will be saved on the memory card. Visit the PIXELAs site to download the zip file, which contains the software and instruction manual. 2 Uncompress the zip file. Refer to the ImageBrowser EX User Guide PDF file for the full system requirements. If you cannot find the icon, check your Internet connection and install the software again. Refer to relevant sections in the ImageBrowser EX Instruction Manual, which can be accessed through the. The index screen will appear. 5 Touch a recording to play it back. Introduction to WiFi When you use the camcorder's WiFi function to connect to a smartphone 1, you can wirelessly save, play back and upload your. While using WiFi functions, the camcorder's automatic power off function will be disabled. As such, the maximum data transfer rate is 11 Mbps for IEEE 802.11. The camcorder's SSID network name and password will appear. The camcorder will be ready to connect with the smartphone. 2 Smartphone Activate WiFi in the settings screen. NOTES The following types of MP4 scenes will be recognized as multiple files on other devices. For details about the Movie Uploader app, visit PIXELAs Web site. English only The following types of MP4 scenes will be recognized as multiple files on other devices. You will be able to upload movies and photos to online albums, share the albums on Twitter, upload movies to. The camera settings screen will appear again, Edit Web Service Settings. Depending on the router, the amount of time required may differ. Using the virtual keyboard When you need to enter text for various settings, touch the text field and a virtual keyboard will appear on the screen.

The documentation for your wireless router may also contain a glossary you can refer to. Appendix Menu Options Lists The functions that are available depend on the shooting mode. In the information screen of a memory card you can also check its Speed Class. Consult your dealer or a Canon Service Center if the problem persists. CHECK THIS FIRST Power supply Is the battery charged. Is the compact power adapter. Consult a Canon Service Center. A noise can be heard from the compact power adapter. If the camcorder becomes unusually hot or it becomes hot after using it only for a short while, it may indicate. Replace or charge the battery pack. If the problem still persists, remove the battery pack and disconnect all other power sources from the camcorder. Playback looks fine on the camcorder but there is no image on the TV screen. The video input on the TV is not set to the video terminal to which you connected the camcorder. Wireless playback on a computer or similar device is not smooth. If the problem persists, contact a Canon Service Center. Cannot play back Check the memory card There is a problem with the memory card. Disconnecting the USB cable or power source while this message appears may result in permanent loss of the recordings in the camcorder. Some scenes were recorded using another device and cannot be copied. Scenes that were not recorded with this camcorder cannot be copied to the memory. Could not safely remove the external hard drive. While the camcorder was connected to an external hard drive, the camcorder's compact power adapter was disconnected and the connection was ended. Check whether data in the hard drive was corrupted. Unable to connect Cordless phones, microwave ovens, refrigerators and other appliances may interfere with the wireless signal. End the WiFi connection and try again later. This image cannot be sent You attempted to send a type of recording or a file with a size that is not supported by the selected Web service.

This will protect your important recordings in case of damage and create more free space on the memory. Canon shall not be liable for any data loss. Do not carry the camcorder by the LCD panel. Be careful when closing the LCD panel. The camcorder is not waterproof avoid also water, mud or salt. Data may be corrupted or lost due to memory card defects or exposure to static electricity. Canon shall not be liable for lost or corrupted data. Do not touch or expose the terminals to dust or

dirt. To writeprotect the memory card set the switch to the LOCK position. LOCK switch Builtin Rechargeable Lithium Battery The camcorder. Never use chemically treated cloths or volatile solvents such as paint thinner. Lens If the lens surface is dirty, autofocus may not work properly. Remove any dust or dirt particles using a nonaerosol type blower brush. Consult a Canon Service Center for information on plug adapters for overseas use. The effective usage time of the battery pack may decrease when recording in cold surroundings, when using the brighter screen settings, etc. This mark identifies genuine Canon video accessories. When you use Canon video equipment, recommend Canonbrand accessories or products bearing the same mark. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. Use of shielded cable is required to comply with Class B limits in Subpart B of Part 15 of FCC Rules. Do not make any changes or modifications to the equipment unless otherwise specified in the manual. The program backs the development and dissemination of products with functions that effectively reduce energy consumption.

It is an open system in which business proprietors can participate voluntarily. The targeted products are office equipment, such as computers, monitors, printers, fax, machine, copiers, and scanners. The standards and logos are uniform among participating nations. This model doesn't provide setting options for power management. This product should be handed over to a designated collection point, e.g., on an authorized oneforone basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment EEE. Improper handling of this type of waste could have a possible negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, waste authority, approved WEEE scheme or your household waste disposal service. R40 Model 6130190 Reproduction Warning This device is designed to be used in a legal manner, in accordance with all applicable laws, including, but not limited to, counterfeit and copyright laws, as well as laws pertaining to national security. Canon is not responsible for how this scanner is used by an individual. Copyright Copyright 2019 by CANON ELECTRONICS INC. All rights reserved. No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or by any information storage or retrieval system without the prior written permission of CANON ELECTRONICS INC. Please read the following manuals carefully and familiarize yourself with the functions of the scanner before use to ensure you sufficiently understand the functions and make the most of the scanner's capabilities.

After reading the manuals, store them in a safe place for future reference. Manuals for the Scanner Documentation for this scanner consists of the following manuals. Product Safety Guide Before using the scanner, be sure to read and follow these instructions. Setup Guide This describes setup procedures for the scanner. WARNING Indicates a warning concerning operations that may lead to death or injury to persons if not performed correctly. To use the scanner safely, always pay attention to these warnings. IMPORTANT Indicates operational requirements and restrictions. Be sure to read these items carefully to operate the scanner correctly, and avoid damaging the scanner. To use the scanner safely, always pay attention to these cautions. Hint Indicates a clarification of an operation, or contains additional explanations for a procedure. Reading these notes is highly recommended. Computer CPU Intel Core 2 Duo 1.66GHz or faster Intel Core i7 2.3GHz or faster Memory 1 GB or more 8 GB or more Hard disk 3 GB or more available space required for installation of all software USB interface HiSpeed USB2.0 Monitor Resolution of 1024 768 XGA or better recommended. For

the latest software support information, go to the Products page on the Canon website. However, normal operation is not guaranteed with all USB interfaces, even if present as standard equipment on the computer. Turning the Power ON The power of the scanner can be turned ON and OFF with the power button on the front of the scanner. 1 Make sure that the scanner and computer are connected properly. 2 Press the power button. The power button lights blue when the power turns ON. Hint A balloon message such as shown below appears on the task bar. If you wait a while, automatic scanner recognition will end and the scanner will become ready to use. Turning Off the Power Press and hold the power button until the indicator goes out.

IMPORTANT Hint The scanner's auto power off setting is enabled by default, and the scanner will turn off automatically if it is not operated for 4 hours. Check the status of the power switch and USB cable. When the scanner is properly connected to the computer, the CaptureOnTouch icon appears on the taskbar as follows. If the taskbar icon appears as, the scanner is not properly connected to the computer. Installation Location The performance of this scanner is affected by the environment in which it is installed. If this is unavoidable, use curtains to shade the scanner. Avoid locations where a considerable amount of dust accumulates as dust may adversely affect the inside of the scanner. Avoid warm or humid locations, such as in the vicinity of a water faucet, water heater, or humidifier. Avoid locations where ammonia gas is emitted. Avoid locations near volatile or flammable materials, such as alcohol or paint thinner. Avoid locations that are subject to vibration. 10 Avoid exposing the scanner to rapid changes in temperature. If the room in which the scanner is installed is cold but rapidly heated, water droplets condensation may form inside the scanner. This may result in a noticeable degradation in scanning quality. When disconnecting the power cord, grasp the plug and remove it from the outlet. Keep the area around the power cord clear of objects so that the power cord can be disconnected easily in an emergency. Do not use an AC adapter other than the one provided with the scanner. Do not use the AC adapter provided with the scanner with other products. If you have any questions regarding the power supply, contact your local authorized Canon dealer or service representative for further information. Also, when using an extension cord, make sure that the extension cord is rated for the current requirements of the scanner. The power cord may become damaged if it is often stepped on or if heavy objects are placed on it.

When moving the scanner, always hold it with both hands to avoid dropping it. Make sure to disconnect the interface cable and AC adapter before moving the scanner. If the scanner is transported with these items connected, the plugs and connectors may be damaged. Handling WARNING Note the following precautions whenever using the scanner. Failure to do so may result in a fire or electric shock. Never use alcohol, benzene, paint thinner, aerosol sprays, or any other highly flammable substance near the scanner. Do not cut, damage, or modify the power cord. Do not place heavy objects on the power cord, and do not pull or excessively bend the power cord. Never connect the power cord when your hands are wet. Do not connect the scanner to a multi plug power strip. Do not knot or coil the power cord as this may result in a fire or electric shock. When connecting the power cord, make sure that the power plug is securely and completely inserted into the power outlet. 11 The supplied power cord set is intended for use with this scanner only. Do not use it with other electronic equipment. In addition, do not use power cord sets other than the one supplied with the scanner. Doing so may result in fire or electric shock. Do not take the scanner apart or modify it. Never try to take the AC adapter apart or modify it in any way, as this is dangerous. Do not use flammable spray near the scanner. Do not drop the scanner, or subject it to impact or strong shock. Should the scanner ever become damaged, immediately push the power button to turn it OFF, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or service representative to have the unit serviced. Before moving the scanner, be sure to push the power button to turn it OFF, and disconnect the power plug from the power outlet CAUTION.

Do not install the scanner on a surface that is unstable or tilted, or in an area subject to excessive vibrations, as this may cause the scanner to fall, resulting in personal injury or damage to the scanner. Never place small metal objects such as staples, paper clips, or jewelry on the scanner. These items may fall into the scanner, and cause a fire or electric shock. Should such objects ever fall inside the scanner, immediately push the power button to turn it OFF, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or service representative to have the unit serviced. Never use alcohol, benzene, paint thinner, or any other flammable substances. If the scanner makes strange noises, or gives off smoke, heat, or strange odors, or the scanner does not function or other abnormalities occur when you use the machine, immediately push the power button to turn it off, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or service representative to have the unit serviced. Do not install the scanner in a humid or dusty location. Doing so might cause a fire or electric shock. Do not place objects on top of the scanner. Doing so might cause a fire or electric shock. When unplugging the power cord, grasp it firmly by its plug. Do not pull directly on the power cord, as this may damage or expose the cord's internal wiring, resulting in a fire or electric shock. Leave sufficient space around the power plug so that it can be unplugged easily. If objects are placed around the power plug, you will be unable to unplug it in an emergency. Do not allow water or flammable substances alcohol, paint thinner, benzene, etc. to spill into the scanner, as this may result in a fire or electric shock. Doing so might cause a fire or electric shock. Push the power button to turn the scanner OFF for safety when not using the scanner for a long period of time, such as overnight.

Also, push the power switch to turn it OFF, and disconnect the power cord from the power outlet for safety when the machine will not be used for an extended period of time, such as during consecutive holidays. Do not wear loose clothing or jewelry that may get caught in the scanner while you are using it, as this may result in personal injury. Be extra careful of neckties and long hair. If anything becomes caught in the scanner, immediately disconnect the power cord to stop the scanner. Be careful when loading paper into the scanner and when removing jammed paper, as it is possible to cut your hand on the edge of a sheet of paper. Disposal When disposing of this scanner, be sure to follow all local ordinances and laws or consult with the retailer who sold you the scanner. When sending the scanner for repairs When a request is made for repairs, the scanner needs to be sent to the specified address. When sending the scanner, use the packing box in which it came. Firmly secure the scanner with packaging material when you place it in the packing box. 12. Card Scan You can scan business or ID cards. Paper Size Detection The scanner automatically detects the size of a scanned document and eliminates any unnecessary space around the edges of the image when storing the image, even when storing a document of irregular size. Auto Color Detection The scanner detects whether the scanned document is in color, grayscale, or black and white, and saves the image accordingly. Full Auto Mode A Full Auto Mode is provided in CaptureOnTouch and the scanner driver to allow scanning under automatically determined conditions. Scanning conditions such as the color mode and page size are set automatically based on the document being scanned. 13 Auto Resolution Detection When enabled in the CaptureOnTouch or scanner driver settings, this function detects the content of documents and determines the scanning resolution automatically.

Deskew The scanner is equipped with a deskew function that straightens images before saving them when documents are scanned askew. The scanned images are straightened, as opposed to the actual document sheets. Ultrasonic Double Feed Detection Ultrasonic waves are used to detect pages that are fed at the same time as well as the space between pages. Scanning stops if a double feed is detected. Double Feed Detection Ignore When a double feed is detected, the DFR button on the operation panel is lit. You can continue scanning by pressing the DFR button. Text Enhancement Modes The scanner is equipped with an Advanced Text Enhancement Mode to enhance the text of documents with dark or uneven backgrounds, and an Advanced Text Enhancement II mode to

enhance the text when both the text and background are light. These modes may not work, depending on the type of document. **Color Dropout** The scanner is equipped with a Color Dropout function that enables you to specify a color for the scanner to omit from the scanned image during black and white or grayscale scanning. **Skip Blank Page Function** The scanner is equipped with a Skip Blank Page function that enables you to scan a document without storing images of blank pages, regardless of whether each page of the document is two sided or onesided. Both sides are scanned, but saving the image is skipped for scan images judged to be from a blank page. **Prescan Function** The scanner is equipped with a Prescan function that allows you to adjust the contrast and brightness of a prescanned image and then send the adjusted image to the application software, without needing to scan the document again. By default, two One Touch buttons are assigned to Job Nos. 1 and 2, which allows you to easily scan a document by just following the instructions on the screen. **Software Updates** The latest software information is periodically acquired from the Internet, and the software is automatically updated.

For details, see the help of CaptureOnTouch. **Auto Start** The scanner is equipped with an auto start function, which enables scanning to be automatically started when a document placed in the feeder is detected. **Sleep Mode** The scanner is designed to save energy by automatically entering the sleep mode if 10 minutes elapse without scanning or another operation being performed. **Hint** Some functions may not be available depending on the software you are using. **14 B Power button** Press this to turn on the scanner. When pressed, the power indicator is lit. Press this button again to turn off the power. The power button lights or flashes as follows depending on the scanner status. **C Document Feed Tray** Place the document. **12 Power Button Indication Description** Lit Power is on Flashing slowly Sleep mode 34 **D Document Guides** Align the document guides with both edges of the document to ensure that the document feeds straightly. Flashing quickly An error paper jam, front unit is open, double feed, etc. has occurred 15 **B Feed Support** Pull this out to support loaded documents. **C Operating Panel** A range of scanning operations can be performed with this, such as starting and stopping scans, executing registered jobs, and cancelling double feed detection. See p. 17 **D Front Unit** Open this when cleaning the inside of the scanner or replacing rollers. 16 **E Document Eject Tray** Pull this out to scan documents. Scanned documents are output here. When scanning multiple documents of varying sizes at one time, pulling out and lifting up this tray locks the angle of the tray, so the documents ejected onto the tray are aligned. **F Document Eject Stopper** This prevents the document coming out of the document eject tray and aligns the leading edges of the ejected document. It can be moved to any position on the document eject tray to match the length of the document. 123456 **B Power Connector** Connect the supplied AC adapter to this connector.

C Theft Prevention Hole Security Slot Connect an antitheft key chain or the like. **Operating Panel A Job No. Indicator** Displays the number of the job selected with the operating panel. **B Job Select Button** This selects registered jobs. Every time the button is pressed, the Job No.Indicator changes. **C Start Button** This executes the job displayed in the Job No. Indicator. **D Stop Button** This stops active jobs. **E DFR Double Feed Release Button** This is lit when a document double feed is detected. Pressing this button cancels the double feed detection function, allowing you to continue scanning. **1Displayed Error Codes 23** When a scanning error occurs, the following error codes are displayed in the Job No. Indicator. 1 2 3 4 5 displayed when the front unit is open. displayed when a paper jam is detected. displayed when a double feed is detected while scanning. displayed for other errors. 17. The document sizes that this scanner can scan are shown below. **IMPORTANT** The documents to be scanned must satisfy certain criteria. To scan such a document, make a photocopy of the document and then scan the photocopy. **Carbon paper** There are curls. The surface is coated. There are tears. **Extremely thin document** such as semitransparent thin paper. There are clips or staples. **Documents with excessive paper dust particles.** 19 **How to Place Documents** Scanning multiple documents Standard paper feeding should be used when scanning multiple documents of a standard size at one

time. Standard paper feeding enables multiple documents to be fed while separating each page. 1 Pull out the document eject tray. The document eject tray can be adjusted to 3 lengths. Pull out the document eject tray according to the length of the document. Also, erect the document eject stopper on the front edge if necessary. 20 IMPORTANT Pull the document eject tray forward according to the various lengths. 2 Pull out the feed support. Open the feed extension support when placing long documents.

3 Adjust the document guides to fit the width of the document to be scanned. 4 Place the document. After placing the document, align the document guides with both edges of the document. If you place cards to be fed vertically, they may not be ejected properly, and cards that get jammed may be damaged when you remove them. Proper scanning will not be possible if the document is too close to either side, tilted, or protruding from the carrier sheet. Yes No No No Carrier sheet is a consumable item. Replace it with a new one when necessary, if there is visible damage or smudging. Be careful to avoid paper jams. Errors also occur due to memory shortage, and scanning may be disabled. By using this function, the scanner will automatically stop when it detects that multiple documents have been fed at the same time. You can also specify whether to save the scanned image after scanning has finished and continue scanning the document double feed detection ignore function. To use the double feed detection function, you must first open the scanner driver settings screen and enable double feed detection. When this happens, the following error code is displayed in the Job No. Indicator of the operating panel. Also, a message screen is displayed to notify you that a double feed has been detected. Double feed detection error code When using the double feed detection ignore function If a document double feed is detected during scanning, document feeding stops when the double fed documents are ejected. The following error code is displayed in the Job No. Indicator of the operating panel, and the DFR button lights. Place the double fed document again before clicking this button. Scanning methods Scanning with CaptureOnTouch What is CaptureOnTouch. CaptureOnTouch is a scanning application that enables you to scan a document with a simple operation merely by selecting the screen panel. For details about the operations and functions, see the help of CaptureOnTouch.
